Summary

BSIT graduate with a solid foundation in hardware and software troubleshooting, basic networking, and Windows environment management. Looking to apply problem-solving skills and a client-focused mindset in IT Technical Support role while continuing to develop technical skills and contribute to team goals.

Technical Skills

Troubleshooting & Support

- Hardware & Software troubleshooting, PC assembly, OS installation, driver/software configuration and general software support
- Basic maintenance and troubleshooting of CCTV systems and printers
- Remote support using AnyDesk
- Ticketing systems: Freshdesk, Jira

Operating Systems

- Windows OS – file/printer sharing, user profiles, disk management etc.
- Windows Server – Active Directory (user/group management, OU structure, Group Policy)
- Linux OS – basic navigation and system familiarity

Networking Fundamentals

- Basic network setup – laying out small office/home networks, configuring IP addresses and gateways
- Troubleshooting connectivity issues – no internet, IP conflicts, cable/Wi-Fi diagnostics
- DNS, DHCP, subnetting, and basic router/switch configuration
- Practiced using Cisco Packet Tracer for network simulations

Development & Tools

- Front-end: ReactJS, Tailwind CSS, Bootstrap
- Back-end: PHP, MySQL
- UI/UX Design: Figma
- Productivity: Microsoft Office (Word, Excel, PowerPoint)

Soft Skills

- Good to excellent communication skills
- Problem-solving mindset
- Adaptable to new technologies
- Friendly and approachable
- Team-oriented with a collaborative attitude
- Receptive to feedback and highly trainable

Work Experience

Creative Bananas (Web Developer & Web Design Intern)

Feb 2025 — April 2025

- Developed and maintained websites using WordPress
- Translated design mockups into responsive web pages and implemented basic SEO practices
- Created UI designs and interactive prototypes in Figma for handoff to developers
- Followed brand guidelines and user experience best practices
